PROJECTS

KJ&SK Leave Management System (React.js, Express, PostgreSQL)

[Live Demo](#)

- Developed a full-stack Leave Management System featuring Role-Based Access Control (RBAC) for Employees and Managers.
- Integrated automated email notifications using Nodemailer: sends instant leave requests to Managers and status updates (Approval/Rejection) to Employees.
- Built dedicated workflows for employees to apply for leave and for managers to review, approve, or reject applications.
- Engineered dynamic backend REST APIs with Node.js/Express backed by a PostgreSQL database for structured data management and leave history tracking.

Tour & Travel Platform (MERN Stack)

[Live Demo](#)

- Developed a comprehensive full-stack Tour and Travel web application with secure end-to-end booking workflows.
- Implemented robust Authentication & Authorization with Role-Based Access Control (RBAC) using JWT.
- Designed Admin & User dashboards to manage tours, packages, bookings, and user activity tracking.
- Integrated RESTful APIs for fluid data communication between React frontend and Node.js/Express backend.

Smart Grihini - House Management System (React Native + Expo)

[Live Demo](#)

- Architected a full-stack mobile application using React Native (Expo), Express.js, and Neon PostgreSQL database.
- Engineered an Expense & Budget Manager with real-time tracking, remaining balance calculations, and Daily Meal Planner.
- Implemented secure JWT Authentication and dynamic task management with interactive checklists.

Note Manager App (MERN Stack)

[Live Demo](#)

- Developed a secure full-stack Note Manager application supporting complete, secure CRUD operations.
- Implemented user authentication and resource authorization utilizing secure JWT integration.
- Leveraged MongoDB Atlas cloud service for robust, scalable, and highly available data storage.
